FORT WORTH MARKETS-DAILY BE VIEW

A bouyant feeling in all lines of trade was apparent to day and the volume of business unusually heavy. Hams declined to-day to per pound. Cabbage is off 25@50: a crate. Eggs are in good demand at good prices.

25@50c a crate. Eggs are in* good demand at good prices.

A NEW ERA OF PROSPERITY.

The signs of national prosperity are everywhere multiplying. All departments of ousiness are alive with the hum of profitable activity, and we are as yet only on the threshold of good times.

There is an immense amount of building enterprise of all kinds everywhere visible from Maine to Texas. We are constructing new railway tracks at the rate of 6000 miles a year, and these lines are being simultaneously equipped with locomotives, cars and other supplies, all of which, including the steel rails, have to be transported over other lines.

The old companies are at the same time so overrun with business that they are adding enormously to their roiling stock, a case in point being the building of 6000 new cars by the Penesylvania company. All the car shops and locomotive works in the country are consequently working up to their full capacity. Real estate building is just as active, and every city, town and village from Maine to Texas bears abundant evidence of the fact. Not only have we a population of 61,000,000, but the Nation is developing its material resources with amazing celerity. Of course, building materials form a heavy item of the total

amazing celerity. Of course, building materials form a heavy item of the total traffic of the railways, but the improve-ment extends to everything and in all di-

The west-bound traffic of the rallways has been fully as good as the east-bound, and no more active movement of lumber and iron ore, and grain and provisions was ever known than that of the present

was ever known than that of the present season in the West, the Northwest and the Lake Superior region.

If we turn to the South, we find its growth phenominal this year, and the published statistics of the year 1885 6 are not late enough to convey a full sense of the swift development its material and manufacturing resources are undergoing; but even these show that the manufactures of the South are now 40 per cent. of its whole product, against 32 per cent. in 1880, the value of these for the year being \$505,892,600, against \$315,924,794 in 1879-80. Meanwhile, too, there has been a corresponding agricultural development of that section, which makes an increase in the total valuation of Southern products of no less than \$552,000,000. manufacturing resources are undergoing;

With such activity, how can the rail-ways fail to share in it and grow in value? ways fall to share in it and grow in value?
And to this growth in value prices must
inevitably respond. Abundant harvests
are at the back of all this growing prosperity. Wheat and all the other garnered
crops have proved not only very large,
but much larger and finer than the statisticians estimated, and corn and cotton promise to more than equal expecta-

Already we are practically assured of 1,000,000 bales more cotton than we had last year, and there is a broadening market for it abroad, while the golden har-vest of corn will probably amount to not far from 1,700,000,000 bushels. This crop is now rapidly ripening for the reaper, and therefore all danger from frost is long past.

A large and profitable business is being and will continue to be done, larger than ever heretofore, for our population is larger and the country occupied con-

stantly expanding.

We have entered upon a new era of prosperity, and Wall street has so far merely had a foretaste of it. Before it fully develops itself we shall see n prices and a vaster volume of speculation than are at present thought of by even the most enthusiastic of optimists .- [The Investigator, New York.

DR. JOHN BULL'S

FEVER and **ACUE** Or CHILLS and FEVER.

AND ALL MALARIAL DISLASES.

AND ALL MALARIAL DIS_ASES.

The proprietor of this celebrated medicine justly laims for it a superiority over all remedies ever offered to the public for the SAPE, CERTAIN, SPREDY and PERMANENT cure of June 12 Pever, or Chills and Pover, whether of short or long standing. He refers to the entire Western and Southern country to bear him testimony to the truth of the assertion that in no case whatever will it fail to cure if the directions are strictly followed and carried out. In a great many cases a single dose has been sufficient for a cure, and whole families have been cured by a single bottle, with a perfect restoration of the general health. It is, however, prudent, and in every case more certain to cure, if its use is continued in smaller dose, for a week or two after the disease has been checked, more especially in difficult and long standing cases. Usually this medicine will not require any aid to keep the bowels in good order. Should the patient, however, require a cathartic medicine, after having taken three or four doses of the Tomic, a single dose of KENT'S VEGETABLE FAMILY FILLS will be sufficient. Use no other.

A TRUE TEST.

al tests" have placed first one brand of baking powders then another at the head of the list, but the most satisfactory test of all is that of the practical housewife and never falls to and never falls to make light and wholesome bread. She cannot be im-posed upon, and the powder peddler who attempts to paim of something e.se on her as a better grade of goods will have ressun to believe that he has Edesou his colling.
